Speed Through Life with New Pedometer

Trace your steps this summer with the Omron HJ-720ITC pedometer, which comes complete with a USB connection and software. Track days, weeks, months and years of exercise on your personal computer. Dual-sensor technology (no moving parts) allows you to carry your pedometer in a pocket or a bag without damaging accuracy. The pedometer measures steps, aerobic steps, time spent walking, calories and distance with a data capacity of 41 days. **(Bodytronics.com, US\$59.99)**

Recharge Two Devices at the Same Time

The Callpod Fueltank can simultaneously charge two small electronic devices without an outlet. The Fueltank contains a rechargeable lithium ion battery that has more than seven times the capacity of a standard mobile phone. Proprietary voltage regulator technology senses the amount of power required to charge your gadgets, and LED fuel capacity indicators display when the charging indicator button is pressed. Recharge several devices without refuelling. **(Callpod.com, US\$69.95)**

New Camera Outlasts Cold, Deep Dives

Soaking. Freezing. Dropping. Adventurous meets clumsy in the waterproof, cold-proof and now shockproof Optio W80. Dunk it, freeze it, drop it and it will keep coming back for more. The Optio features 12 megapixels, 5X internal optical zoom and a wide-angle 28-millimeter lens. The camera also offers widescreen HD movie capture that records up to 1280x720 pixels at 30 frames per second. Dang. **(Pentaxwebstore.com, US\$299.95)**
